### Put Your Land to Work.

"Put your money to work" was the advice of Russel Sage, the great financier, whose estate when probated equalled almost two hundred million dollars. all accumulated by himself within fifty years. The sum mentioned is beyond the comprehension of most persons.

Had our first parent Adam received an income of \$50.00 per day saving every cent of it from the day he was created to the present time, his fortune today would not equal one half the sum acquired by Russel Sage.

What many will consider an insufficiency to warrant an investment is undoubtedly enough to buy and plant at least one acre of fancy paper-shell Pecan trees. The whole cost for the trees, planting and cultivating will not cost you very much money, and the product on the tenth year will be worth from \$150 to \$250 with an assured annual increase of ten to twenty-five per cent. Five acres at twenty years makes any man independent.

Mr. Louis Koenig, the pioneer trucker of this section, tells us he has six acres of cabbage and three of onions this season which are doing nicely. Mr. Koenig deserves a large measure of credit for what he has done in the demonstration of the profitability and practicability of truck growing in this locality, and his efforts and influence have put the farmers and general resources of this locality many thousands of dollars to the good.

There will be a grand ball given at Lone Tree school Feb. 20. Everybody invited to come and have a good time.

Mr. Henry Howard was in during the week from Concrete and laid in a supply of fence netting, explaining that he had planted three acres of alfalfa and his chickens were so fond of the young green growth that he feared that unless fenced off they would prevent it getting the desired start. If he has success with this he says he will plant thirty acres of alfalfa next year.
